

Developing real estate. Investing in the community.

It takes a perfect combination of experience and integrity to turn a real estate investment into a real part of the community. It's what we call a common sense approach to real estate development. Since 1999, Weaver & Woodbery has been developing successful real estate investments by anticipating marketplace opportunities and by working with the communities involved in our acquisitions.

We currently own, manage and lease properties totaling over one million square feet of office and industrial space. In addition, we are currently developing over 200 single-family residential lots throughout metro-Atlanta.
